**DEFOG IT ANTIFOG TOWELETTES EARN
NATIONAL TACTICAL OFFICERS ASSOCIATION MEMBER TESTED AND
RECOMMENDED SEAL**

April 28, 2010 – Valley View, Ohio – [Defog It antifog](#) towelettes have been awarded the National Tactical Officers Association’s Member Tested and Recommended Seal. Members of the NTOA who are active law enforcement officers field tested and reviewed the Defog It 3-pack of towelettes for use on eyeglasses, shooting glasses, faceshields and goggles, as well as for optics such as riflescopes and binoculars.

Individuals and organizations can find more information and purchase Defog It at www.defogitworks.com or at 1-888-ENDS-FOG.

One field tester, a law enforcement officer in Wisconsin, wrote this review: “I had the opportunity to test the Clarity Defog It Antifog 3 Pack at a recent full scale SWAT exercise and found the cloths to perform well...I found that during the exercise I did not experience any fog on my glasses when moving from outside the building to inside the building even in full gear and while under the stress of a realistic training scenario...based on my experience with the Clarity Defog It Antifog cloths I was impressed and would recommend them.”

Another field tester, a law enforcement officer in New York wrote: “During the time of testing there were frequent temperature variations from below freezing to 60+ degrees. My assigned duties also involved my getting in and out of a vehicle (controlled temperature environment) frequently. At no time did I encounter the lenses fogging in these conditions. I would recommend this product.”

The Defog It antifog formula is used by the military worldwide. The antifog towelettes and antifog liquid provide safe, long-lasting fog prevention for all types of optics. In lab testing a lens treated with Clarity Defog It was held over constant hot steam for 60 minutes, and no fog ever forms. Other products failed in as little as 5 minutes. In another test, a treated lens was moved between a 30° freezer and a 72° room 100 times without fog ever forming.

“In a tactical situation, fog-free vision can be a life-and-death issue,” says Scott Rickert, President of Nanofilm, maker of Clarity Defog It. “Clarity Defog It was developed to give officers fog protection they can count on in the heat, perspiration, cold and humidity – the worst environments they have to face, indoors or out.”

The Defog It review will be added to the NTOA online Member Tested product database and a review will soon be published in *The Tactical Edge* journal. Defog It antifog has also received the seal of approval from the 750,000-member North American Hunt Club

and has undergone testing by firefighters, military training units, utility professionals, snowsports professionals and manufacturing organizations.

Clarity Defog It™ is made by Nanofilm, a global optical leader in lens care and coatings. Millions of people around the world use Nanofilm lens care products, as well as nanotechnology-enabled coatings. More information is available at www.nanofilmproducts.com.
